Planning Application: P16-065

Proposal: Nine (9) lot subdivision and removal of native vegetation

Address: Lightwood Park Road, Haddon

Thank you for your correspondence with a response to the Department of Environment, Land, Water & Planning (DELWP)'s request for further information dated 4 April 2017. I apologise for the delay in this reply.

DELWP has considered the above application in accordance with Section 55 of the *Planning and Environment Act 1987*.

The application proposes to remove 10.413 hectare of native vegetation for subdividing land in to nine (9) lots including access, including the creation of new new property boundaries and bush fire defensible space.

The offsets required to mitigate the proposed native vegetation removal in accordance with the *Permitted clearing of native vegetation – Biodiversity assessment Guidelines* (DEPI 2013) are 0.943 biodiversity equivalence units.

I wish to advise that DELWP does not object to the granting of the planning permit subject to the following conditions being included in the permit:

1. Before works start, the permit holder must advise all persons undertaking the vegetation removal or works on site of all relevant permit conditions and associated statutory requirements or approvals.
2. Before works start, a plan to the satisfaction of Responsible Authority identifying all native vegetation to be retained and describing the measures to be used to protect the identified vegetation during construction, must be prepared and submitted to and approved by the Responsible Authority. When approved, the plan will be endorsed and will form part of this permit. All works constructed or carried out must be in accordance with the endorsed plan.

3. To offset the removal of 10.413 hectares of native vegetation the permit holder must secure a native vegetation offset, in accordance with the *Permitted clearing of native vegetation – Biodiversity assessment guidelines* (DEPI 2013) and *Native vegetation gain scoring manual* (DEPI 2013) as specified below:

A general offset of 0.943 general biodiversity equivalence units with the following attributes:

- be located within the Corangamite Catchment Management Authority boundary or Golden Plains Shire Council municipal district; and
- have a strategic biodiversity score of at least 0.082.

4. Before any native vegetation is removed, evidence that the required offset for the project has been secured must be provided to the satisfaction of the Responsible Authority. The offset evidence can be:
- a) a security agreement signed by both parties, to the required standard, for the offset site or sites, including a 10 year offset management plan and/or
 - b) an allocated credit extract from the Native Vegetation Credit Register.
5. If a security agreement is entered as per condition 4 (a) the applicant must provide the annual offset site condition report to the Responsible Authority by the anniversary date of the execution of the offset security agreement, for a period of 10 consecutive years. After the tenth year, the landowner must provide a report at the reasonable request of a statutory authority.
6. Unless otherwise agreed in writing by the Country Fire Authority and the Department of Environment, Land, Water and Planning, offsets must not be located within the 150 metre BMO assessment area in accordance with the *Planning for Bushfire Victoria, Guidelines for Meeting Victoria's Bushfire Planning Requirements* (CFA 2012).

In accordance with Section 66 of the *Planning and Environment Act 1987*, would you please provide a copy of the permit, if one is granted, or any notice to grant or refusal to grant a permit to the above address.

Yours sincerely
